## Current Work

- Completed Section 1-3 of the Repair Standard and available for your review– Copies should be available on tables
- Milestone 7 – Section 4 Facility Requirements – in progress
- Milestone 8 – Section 5 Tools and Equipment – in progress
- Milestone 9 – Employee Classification – in progress

## Milestone 7

- Section 4 - Facility Requirements
- Defined? Thought we were finished?
- Found overlap between Section 4 and 5 and decided to review both section simultaneously so we would not duplicate effort
- Section 4 will be only Facility Physical Requirements

## Milestone 8

- Section 5 - Tool and Equipment Requirements
- Reviewing Current NATEF Tools and Equipment list and will use this as a starting point.
- Will provide required and recommended list of tools and equipment for both the repair facility and individual technician.

## Milestone 9

- Section 6 - Employees (Technical)
- Working with I-CAR to create job descriptions/levels and tasks etc. Again, we don't want to duplicate effort.
- We will not define positions such as receptionist, secretary, etc. Once the document is completed we may look at other positions definitions such as production manager, parts manager etc.

# Question?

- Thank You for your attention
- Hope everyone has a great 2010!
